

Spring Maintenance Checklist for your Truck

Wash & Undercarriage Cleaning

<input type="checkbox"/>	Use a high-pressure wash, including underside, axles, and behind guards
<input type="checkbox"/>	Remove all dirt and road salt to prevent corrosion

Overall Inspection

<input type="checkbox"/>	Look for any rust/corrosion, especially around joints, undercarriage, air lines and electrical connectors
<input type="checkbox"/>	Inspect for cracks or fatigue, especially in your frame, cross members, kingpin area, and suspension mounts
<input type="checkbox"/>	Check for any leaks of air, oil, grease or water intrusions
<input type="checkbox"/>	Don't overlook your windshield wiper blades, which can take a beating during the winter
<input type="checkbox"/>	Check your air filter and replace if necessary
<input type="checkbox"/>	Clean debris from the radiator and air intakes to prevent overheating
<input type="checkbox"/>	Check your cooling system to ensure proper concentration of coolant

Tires

<input type="checkbox"/>	Check your tread depth and sidewall condition
<input type="checkbox"/>	Look for uneven wear
<input type="checkbox"/>	Inspect for proper inflation

Suspension & Axles

<input type="checkbox"/>	Inspect leaf springs, bushings, shocks, and mounts
<input type="checkbox"/>	Check axle alignment to prevent tire wear and improve handling

Brake System Check

<input type="checkbox"/>	Inspect your drums, rotors, pads/shoes and lines for wear or cracks
<input type="checkbox"/>	Confirm air pressure systems are working properly and holding pressure
<input type="checkbox"/>	Drain any residual air tank moisture

Lights & Electrical System

<input type="checkbox"/>	Test all exterior lights and markers - corroded contacts are common after winter moisture exposure
<input type="checkbox"/>	Clean and protect electrical connections

Lubrication

<input type="checkbox"/>	Re-grease all moving parts, especially landing gear, hinges, and fifth wheel components
<input type="checkbox"/>	Check for dry or frozen fittings

Flooring & Interior

<input type="checkbox"/>	Inspect the floor for rot, cracks, or delamination
<input type="checkbox"/>	Clean out road grime and check for mould/mildew buildup in damp areas

Door & Seals

<input type="checkbox"/>	Check your rear and side doors to make sure they are operating smoothly
<input type="checkbox"/>	Inspect seals for cracking, gaps, or water damage

Check Paperwork

<input type="checkbox"/>	Renew inspection tags, plates, and insurance docs if needed for continued operation
